

Introduction

This document is a concise Buisness Plan. It follows the 6 Page Memo Style, which got popular over Amazon's use in executive mettings. I chose this structure because it inherits reading flow, aims executives and I'm good familiar with it.

First, let me introduce you to Cubo. Cubo is a wooden cube, that you can place on every desk, coworking space, household and a great crafted piece of wood for every interior. Cubo is also a Blockexplorer which adapts to the Users needs. Cubo is the answer of Complexity and rooden language in the technology and especially the crypto space. Cubo is a product of the Polkar - Team. The team is combine of Botond, a Software Architect by profession and Frank, me, a Buisness Developer.

Before we outline the core elements, lets go back in time and tell our Backstory.

The Backstory

Franks story starts 3 years ago. Crypto was just on the rise. Me, Frank, just started out in conquering this area. The first thing that stood appart compare to anything else that i encountered is, the language. Its scary, unpleasant and feels wanna be smart in many corners.

Nontheless after a brief of time, i got used to it and adopted it. The obvious happend. Another Problem appeared. Noone understood me and to communicate crypto ideas to non crypto people is an nightmare. Thats not the first time that i encounter this issue. f.e. the medical industry shares the same issue.

I did, what i usually do. I simplify. Get rid of the ideas, get rid of the concepts, get rid of the buzzwords. Get as close to the already known as possible. That leads to a point where i acquired a language thats catchy and understandable. Even for Grandma.

It has a drawback. Its worth taking but a drawback nontheless. Its not appealing for Business and Technology enviornment. People smile over this kind of communciation style. But the right language lies where the market sits. The market sits in the everydays. Things that people buy in a supermarket, that people buy in a drug store, that people buy in amazon, that people buy ...

If Crypto wants high adoption, then lets switch gears and bring our great tools in every shelf, let people explore it by themselfe and make money meanwhile.

Now, to the current time. Botond and Me met on another Coding Competition. It was just us two in a team. We had great fun together. Admiration of each other was there from the get go. Everyone throw something on the table, which the other person saw extrem rarely before.

We decided to go for another round, choose Dora Hacks Polkadot Hack and throw a coin for which category we are tackling. Category Polkadot ecological developer tools.

Cubo

We need an Idea. Botond came up with a AI blockexplorer. You type what you want to get what you asked for. I thought about an AR Cube. Holograms are sized, colored, animated based on Blockchain Data. Inspired by one the sucess stories in the Auguemted Reality space, called Merge Cube. So met in the middle and come up with Cubo.

Then we casted our spells, one after the other. We scratched Software Design Sheet. We 3D Printed first Prototype. We attach QR Codes. We scratched ai driven visualtion engine, inspired templating engines. We decided for going with search for configuration of visualtions. We decided to add Dashboard Utilizies. We redesign the Cube, lasered it out, stiched it togehter. We scratch around in Figma for good intiutive layout and userfriendly UX. We made simple user tests and collect some feedback. We decided on a useful repo structure. We added docs, presenation, buisnessplan, pitch deck to round it up. 2 weeks are gone, deadline is there and we are happy. Top notch timing for upcomming christmas.

(a) Configurable Dashboard

(b) Physical Product

Figure 1: Cubo

Back to buisness. How we plan to make money. We seperated it in 2 groups. Group A is for everyone. We call Group A, the everyones. We sells Cubo's to everyones. Group B is for Techies. We call Group B, the techies. We sells Access Token to unlock Dashboards for us Techies needs.

Cost and Revenue

Group A - Everyones: We sell Cubo's

Table 1: Sales, Cost, and Earnings

Sold	Cost	Earning
1	\$10	\$40
10	\$100	\$400
100	\$1000	\$4000
1000	\$10000	\$40000
10000	\$100000	\$400000

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat.

Group B - Techies: We sell Access Tokens

Table 2: Sales, Cost, and Earnings

Sold	Cost	Earning
1	\$1	\$1
10	\$2	\$10
100	\$3	\$100
1000	\$4	\$1000
10000	\$5	\$10000

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat.

Market Strategy and Timeline

Conclusion
